# JUNCKERS PUR CARE PROGRAMME

Offers **simple and effective** products for restoration and maintenance of synthetic floors

---

A PUR surface treatment extends the life of PU-floors, vinyl (PVC) floors and linoleum floors while restoring their original appearance and wear resistance.

The programme also offers the opportunity to improve the aesthetics of the floors by adding a completely new colour design to the surface.

# KEY REASONS TO RENOVATE WITH JUNCKERS PUR CARE PROGRAMME

## SUSTAINABILITY AND ENVIRONMENT

- PUR extends the lifetime of the floor and minimises the environmental impact.
- Extended lifetime contributes to a reduced amount of waste.
- PUR recreates an easy-to-clean surface that contributes to increased wellbeing in the indoor environment.

## DESIGN AND WEAR RESISTANCE

- PUR restores life and beauty to worn surfaces.
- PUR protects the surface and restores good slip resistance.
- PUR adds robustness and renewed wear resistance to the floor.
- PUR offers the possibility to completely change the look of the surface by adding colour and Design Flakes.

## ECONOMY

- PUR ensures a minimum of downtime for the floor.
- PUR postpones costs related to installing a new floor.

## THE DANISH INDOOR CLIMATE LABEL

Junckers PUR Floor Sealer and PUR Floor Colour carries the Danish Indoor Climate Labelling. A product with this labelling has undergone extensive volatile emission and odour tests. This ensures that there are no chemical substances in the product which adversely affect the air quality in the room.

# SAVE TIME AND MONEY WITH PUR

With PUR, worn-out synthetic floors are given a new lease of life rather than having to be replaced. An economically attractive solution for the owner of the floor, who also achieves a significant saving in downtime compared to the time required to install a brand new floor.

For this 300 m<sup>2</sup> floor, the choice was between installing a completely new floor or restoring with PUR. PUR was chosen and within 3 working days the floor was back in use. Installation of a completely new floor is typically carried out in approximately 6 days. This means that downtime is reduced by 50%. For larger floor areas there is a good opportunity to increase the time saving.

**REDUCE  
DOWN-TIME  
WITH 50 %**

**PUR - A cost-effective solution  
for the budget manager in sports  
halls, healthcare, education etc.**

*Corridor areas at a district heating plant - Treated with PUR Intensive Cleaner, sanded and finished with 2 coats of PUR Floor Sealer*

# HOW LONG DOES A PUR TREATMENT LAST?

Depending on the amount of traffic on the floor, following durability can be expected:

**10  
YEARS**

Up to 10 years at light traffic, e.g. residential areas.

**5  
YEARS**

Up to 5 years at medium traffic, e.g. offices, nursing homes and hairdressers.

**3  
YEARS**

Up to 3 years at high traffic, e.g. childcare centres, sports halls and schools.

## HOW TO KEEP YOUR FLOOR IN TOP CONDITION

Clean the floor on a regular basis using water and a mild soap solution.  
We recommend using Junckers Floor Cleaner.

Regularly check your floor and refresh it before a complete restoration becomes necessary. Refreshing a previously PUR-treated floor can be done in just one working day.

We recommend that you get a service agreement with a professional floor finisher who will check the condition of your floor on a regular basis.  
This will also help to extend the life of the floor.

Avoid maintenance with polish and wax products.  
This makes it difficult to refresh the PUR surface.

# THE PUR CARE PROGRAMME IS EASY TO USE

It is easy to use Junckers' PUR care programme. You just need to follow a few important guidelines to achieve a long-lasting result.

The programme includes a deep cleaning detergent, a robust and durable polyurethane sealer, a range of colours for creative play with patterns and Design Flakes for a decorative terrazzo-like appearance.

These products provide the professional floor finisher with a reliable solution for restoring worn PU, vinyl and linoleum floors.

## PUR INTENSIVE CLEANER

A deep-cleaning detergent that effectively removes old layers of wax and polish. The product is used for intensive basic cleaning before floor restoration and is essential to ensure solid adhesion of PUR Floor Sealer to the substrate.

## PUR FLOOR SEALER

A robust and durable two-component water-based polyurethane sealer, designed especially for restoration of PU, vinyl and linoleum floors. The product is recommended for floors with high wear and provides long-lasting protection to the floor.

## PLAY WITH COLOURS AND FLAKES

Combine PUR Floor Sealer with Junckers PUR Floor Colour, if you want to add colours, shapes and lines to the floors – imagination is the only limit.

New colours can take the aesthetics of a PU, vinyl or linoleum floor to a whole new level.

RAL-1021 YELLOW

RAL-9001 WHITE

RAL-3027 RED

RAL-1015 LIGHT IVORY

RAL-5005 BLUE

RAL-7012 BASALT GREY

RAL-6029 GREEN

RAL-7038 AGATE GREY

RAL-9005 BLACK

RAL-7042 TRAFFIC GREY

With Design Flakes you can give the floor a unique and decorative look reminiscent of terrazzo. The innovative Design Flakes, which are available in white and black, are solidly colored, random in shape and perfect for adding character to the room. The product also helps to hide irregularities in the floor surface.

BLACK

WHITE

# WHERE TO USE PUR?

Use PUR on PU floors, vinyl floors (PVC) and linoleum floors in e.g. educational buildings, offices, retail, hospitals, care centres and sports facilities. With proper preparation of the floor and a few precautions, the applications are almost limitless.

OFFICE

EDUCATION

CHILDCARE CENTRES

SPORTS HALL

RESIDENTIAL

HEALTHCARE

Please note! PUR is not suitable for LVT floors, which are typically designed with a slightly textured surface.

# THE MEDIA SCHOOL IN VIBORG, DENMARK TRANSFORMED WITH PUR

Corridor areas restored with PUR Floor Color in the color Basalt Grey RAL 7012 and a mix of white and black Design Flakes.

A photograph of a corridor floor before treatment. The floor is a plain, light grey color with some visible wear and discoloration. A white metal railing is visible on the right side of the frame.

BEFORE TREATMENT

A photograph of the same corridor floor after treatment. The floor now has a dark grey, textured appearance with a mix of white and black flakes, giving it a terrazzo-like look. The white metal railing is still visible on the right side.

AFTER TREATMENT

## WHY WE OPTED FOR PUR

*"The Media schools in Viborg were looking for a solution that would not involve replacement of the existing 100 m<sup>2</sup> floor covering. I suggested the Junckers' PUR Care programme, which I knew would quickly and efficiently give this type of flooring a new and inspiring look.*

*The work was carried out over a weekend and in that time the floor was given a beautiful new grey colour and a decorative expression in the style of terrazzo. The PUR solution gave the school the opportunity to get the floors back in use with very little downtime and they now have a hard-wearing solution that will be easy to maintain in the future."*

- Michael, Professional Floor Finisher

# SCHOOL HALLWAY TRANSFORMED WITH PUR

Corridor areas restored with PUR Intensive Cleaner,  
sanded and finished with 2 coats of PUR Floor Sealer

A vertical photograph showing a school hallway floor before treatment. The floor is a light tan color and appears dull and slightly textured. There are some faint, darker spots and a horizontal line near the bottom of the frame. A dark green rectangular label with the text "BEFORE TREATMENT" is positioned in the top left corner of the image.

BEFORE TREATMENT

A vertical photograph showing the same school hallway floor after treatment. The floor is now significantly brighter and has a smooth, glossy finish. The lighting reflects off the surface, creating a bright, circular highlight in the center. A dark green rectangular label with the text "AFTER TREATMENT" is positioned in the top right corner of the image.

AFTER TREATMENT

# SCHOOL SPORTS HALL TRANSFORMED WITH PUR

The 6 year old sports hall has been restored with PUR Intensive Cleaner, sanded and finished with 2 coats of PUR Floor Sealer. Line markings are refreshed with PUR Floor Colour.
